SACHIN SOMINATH GAIKWAD

FULL STACK & AI SOFTWARE ENGINEER

+91 97657 52923 | sachingaikwadbn@gmail.com | Pune, Maharashtra, India | Portfolio: my-portfolio-ten-orpin-42.vercel.app

PROFESSIONAL SUMMARY

Passionate and driven Software Developer specializing in **Full Stack Engineering and AI/ML integrations**, with hands-on experience designing, building, and deploying production-ready applications. Proficient in **Java Spring Boot, React.js, Web Speech API, NLP/NLU logic, RESTful microservices, and relational databases**. Proven ability to architect scalable backend services, integrate modern AI capabilities (voice recognition, natural language understanding, LLM/AI APIs), and build responsive user interfaces. Combines strong computer science fundamentals with a business-aware mindset to deliver impactful, production-grade software solutions.

TECHNICAL SKILLS

AI & ML Integration:	Natural Language Understanding (NLU) logic, Intent Classification, Web Speech API (STT/TTS), Third-Party AI/LLM API Integration, Voice AI Systems, AI-powered SaaS Architecture
Backend Engineering:	Java, Spring Boot, Spring Framework, Spring MVC, RESTful API Design, Microservices, Hibernate ORM, Maven
Frontend Engineering:	React.js, JavaScript (ES6+), HTML5, CSS3, Component-Based Architecture, Responsive UI Design
Databases & Security:	MySQL, PostgreSQL, JDBC, Schema Design, Query Optimization, JWT Authentication, Spring Security, RBAC
Cloud & DevOps:	Git, GitHub, Vercel CI/CD, Agile/Scrum, SDLC, Version Control
Fundamentals:	OOP, MVC, REST, CRUD, SOLID Principles, Data Structures & Algorithms
Currently Learning:	Python (Data Structures, OOP, Scripting) for Machine Learning, Data Science, & Advanced Backend Workflows

PROJECTS

Voice AI Assistant | Live Demo

React.js · Java Spring Boot · REST API · Web Speech API (STT/TTS) · NLU Architecture · Vercel

- Designed and deployed a real-time voice-interactive web application featuring browser-based Speech-to-Text (STT) and Text-to-Speech (TTS) via the Web Speech API.
- Implemented an **AI/NLU-powered backend core** in Spring Boot to parse, classify, and execute **14+ distinct voice intents** (e.g., greetings, calculations, web search, media control).
- Built a multi-lingual system supporting **7 languages** (English, Spanish, French, Hindi, German, Japanese, Chinese) with locale-aware speech processing and font rendering.
- Architected a persistent, session-based chat history using local storage and state management, enabling seamless resumption of prior voice interactions across sessions.
- Engineered an accessible, dynamic UI with real-time audio visualization, dark/light themes, and mobile-first responsive layouts across all viewports.

AI SaaS Platform | Live Demo

Java Spring Boot · REST API · React.js · AI API Integration · MySQL · Vercel

- Built and shipped a production-ready AI SaaS platform live on Vercel, maintaining **99.9% uptime** under real user traffic.
- Integrated third-party AI APIs to power real-time conversational features, driving measurable gains in user engagement.
- Reduced average API latency by **30% (500ms → 350ms)** by redesigning the caching layer and optimizing query execution across 10+ Spring Boot endpoints.
- Locked down 100% of the API surface using JWT authentication and Role-Based Access Control (RBAC).
- Configured automated Vercel CI/CD pipelines with zero-downtime releases, cutting deployment turnaround time by **40%**.

Portfolio Website | Live Demo

React.js · Vercel · Responsive UI Design

- Designed and deployed a personal portfolio showcasing full-stack and AI projects, core engineering technical skills, and live application demos.

KEY HIGHLIGHTS & ACHIEVEMENTS

- **Voice & AI Application Delivery:** Architected and deployed a multi-lingual Voice AI Assistant capable of real-time Speech-to-Text, intent parsing, and dynamic response generation.
- **Full-Stack & AI SaaS:** Shipped multiple production applications integrating modern AI interfaces, high-performance Java backends, and React frontends.
- **Backend Optimization & Security:** Secured 100% of API endpoints using JWT & RBAC while optimizing response latency by 30%.
- **CI/CD & Cloud Deployment:** Automated continuous integration and deployment pipelines using Vercel, achieving zero-downtime releases.

EDUCATION

Bachelor of Business Administration (BBA)	Vidhyadhan College - Aurangabad, Maharashtra	**June 2026**
Higher Secondary Certificate (HSC)	Devi Girja Mata Jr College - Aurangabad, Maharashtra	**Feb 2018**
Secondary School Certificate (SSC)	Sant Meera School - Aurangabad, Maharashtra	**Mar 2016**
